

**Simran Sharma (of class XII C) , received a scholarship of \$10000 per year with a financial aid for studying in Juniata through next genius.**

The Next Genius Scholarship Program offers full tuition scholarships to Indian high school students who wish to pursue their undergraduate education in the United States of America.

This year, over 4700 students from 337 schools across India applied to next genius for scholarships. Only 120 of the students from all over the country reached the final interview round.

It is a great platform for exhibiting one's personality and achieving a life changing scholarship completely based on the way you carry yourself. I suggest every eligible student should benefit from this opportunity. Since students from all over the country participate in this event, I believe it gives us a chance to interact with students having strong and unique opinions. I thank our school for enabling me to grab this opportunity
