## CHESS

*Sports is Friendship, Sports is Health, Sports is education,  
Sports is Life and Sports brings the World Together.*

*Through the Sports Club, we teach the students how to play chess and improve their concentration and observation skills, goal setting, agility, hand and eye co-ordination, discipline, how to deal with triumph and defeat & build team spirit in them.*

**Chess** is a two-player strategy board game played on a Chessboard, a checkered game Board with 64 squares arranged in an eight-by-eight grid. Chess is played by millions of people worldwide, both amateurs and professionals.

Each player begins the game with 16 pieces: one king, one queen, two rooks, two knights, two bishops, and eight pawns. Each of the six piece types moves differently. The most powerful piece is the queen and the least powerful piece is the pawn. The objective is to 'checkmate the opponent's king by placing it under an inescapable threat of capture. To this end, a player's pieces are used to attack and capture the opponent's pieces, while supporting their own. In addition to checkmate, the game can be won by voluntary resignation by the opponent, which typically occurs when too much material is lost, or if checkmate appears unavoidable. A game may also result in a draw in several ways.

In the months of June and July, the students were taught to play the game with the brief description and the importance of the game rules and regulations, terms and conditions of the game and movability of coins and playing the game with the techniques.

In the month of August and September students learnt how to play the game with more winning strategies to achieve more perfection, and also learnt how to perform in the tournaments.

Even though chess is the most popular game in the world, there are many people who are just beginning to learn how enjoyable chess is. If you are completely new to chess then start to know the rules and moves to learn the game.
