

CLASS- NURSERY

WEEKLY LEARNING PLAN

WEEK NO – 24

DATES: 07.11.16 to 11.11.16

BLOCK COMMENTARY

From the desk of Nursery teachers,

Dear Parent,

Here is the information about the early programme lesson on

FOOD WE EAT.

In this lesson, students will learn about food, where the food comes from and why we eat food. They will explore the growth of plant and learn about dairy products.

Students will sing a rhyme, sow a seed and observe the plant grow. Students will sort pictures of food items from non-food items. Students will listen to a story about farm animals and dairy products. They will watch the process of making a milkshake and buttermilk and later share their findings.

During Maths time, students will identify, show, trace and rainbow write the number three.

During language time, students will identify the letter and familiar words that begin with the letter 'N'. They will identify and form slanting lines. Students will also look at pictures in a book to see different food items and talk about them.

Rather than simply writing letters directly, students are given a lot of practice to identify and trace different lines used for writing letters such as slanting lines.

At home, children can be asked to find slanting lines in each letters in books and newspapers.

CLASS TEACHERS

NURSERY -A: P. PADMAVATHI

NURSERY- B: P. GEETHALAKSHMI

CO – TEACHER: K. BHAGYA SREE
