

CLASS - NURSERY

WEEKLY LEARNING PLAN

WEEK NO - 31

DATES: 27.12.16 to 30.12.16

BLOCK COMMENTRY

From the desk of Nursery teachers,

Dear Parent,

Here is the information about the early programme lesson on **TRANSPORT**.

In this lesson, students will learn the different ways to travel in their immediate surroundings.

Students will learn how to travel to different places through a conversation between the class puppet and the teacher. Students will share how they travel and use visual data to compare how others in the class travel. Students will sing a song to learn the sounds of different vehicles. They will imitate the movements of the vehicles. Students will observe the parking area and explore the vehicles.

During Math time, Students will learn to estimate quantity as more or less by looking at the estimation jars. Students will estimate and find ways to fit in that many number of blocks into their circles.

During language time, Students will recognise letters and familiar words that begin with letters 'S' and 'T'. students will also trace up and down lines.

Rather than simply comparing numbers, Students will estimate more and less, estimate more or less using number jars; and then check their estimation by counting.

At home, give your child jars to fill more and less water.

- Colouring competition will be conducted on 28.12.16 (WEDNESDAY)

WISH YOU HAPPY NEW YEAR 2017

CLASS TEACHERS

NURSERY -A: P. PADMAVATHI

NURSERY- B: P. GEETHALAKSHMI

CO - TEACHER: K. BHAGYA SREE
