

'NO BAG DAY'-PRIMARY

"Play gives children a chance to practice what they are learning." No burden of a school bag means more emphasis on learning by doing, which is the best form of teaching.

The No Bag Day event was successfully organized in the third and fourth week of December, where students were encouraged to come to school without bags and they were assigned with lots of hands on experience activities. Students of Primary enjoyed the activities and all the subject and co-scholastic teachers facilitated the students with bunch of opportunities to explore and discover many things through different activities. The goals of the activities include developing listening and speaking skills, enhancing geographical knowledge, expressing creativity as well as providing an opportunity for students to explore learning beyond textbooks and develop holistically. Some of the activities include story- telling, JAM, free-hand drawing, role play, marketing, listening the audio clips, elections etc. The activities were planned on different days for grades 1 to 5 and they were impactful and enjoyable.
