

EYE CHECK-UP

An eye check-up was conducted for Pre primary and Primary students on 9th and 10th December'24. A team of optometrists from '**Centre for Sight – Group of Eye Hospitals**' visited our school to examine the children's eyes.

Parents of children with potential vision problems were informed and advised to schedule a follow-up appointment with the optometrist.

The check-up aimed to detect any potential vision problems early on, ensuring our young learners receive the necessary care for healthy vision. The eye check-up was a valuable experience for our preschoolers. We appreciate the support of the optometrists in promoting the eye health of our students. We also thank our school management for organising this check-up.
